«History of the Class of '90.»

UR first year in College! Who can depict the thrill of pleasure, mingled with a to-morrow's dread, that emanates from the soul of a Freshman as he goes for the first time into a Professor's recitation room, and realizes that he is one among that famous crowd—College boys. There were twenty six of us to register October 6th, 1886; each and every one looking as if he was ready and anxious for all the work, pleasure and fun that might fall to his share.

We can boast of some unusual members of Class of '90, having the oldest and youngest men in the College, two married men, two or three Knights of Labor, and one or two members of Class of '89, who found the Fresh so attractive that they concluded to remain with them another year, of which we are very glad, since they (as also the others mentioned) have, by their good general average and excellent behavior, added to the fine record of '90. The remainder of our Class are unusual only by their superiority over the Freshmen Classes who have gone before us, whom you all know.

You now have an outline of what we are. Next I will tell you what we have done. Our first Class meeting was held October 20th, '86, in the Ivy building, to elect Class officers. Each man seemed desirous of an office, consequently there were many candidates and some excitement. After some reasoning by the older members and much force by the stronger ones, quiet was at last restored and the above officers elected, much to the satisfaction of those elected. For a while it was all work and no play—monthly examinations rolled around with alarming rapidity, and as all were anxious to make good impressions on the Faculty, some hard work was done and good papers handed in, as reports show. The Christmas holiday, though short, were enjoyed by all. In the pleasures of home and various other charms, that we need not mention, we forgot that the time for immediate Finals was drawing near. However, our forgetfulness in this instance was no injury, since we have stood the Finals and are nearer the Soph Class than before. We will here remark that our Finals have not been to us “a cause for our undoing.” We all admit that our hearts thumped with fear when we first undertook a Final, but when we had done our best and come out all right, we felt equal to anything the future might bring forth.

Having organized a base ball team, we have been anxious to show

what we could do, but we have not yet been able to persuade any of the other clubs to "tackle" us, so our laurels are yet to win in that line.

In the way of "silver-tongued orators," the Freshmen are proud to know that they are well represented in both literary societies, two of our Class having been elected Spring Debaters, one from each society.

The Sophs would feel too bad if we neglected to give a small notice of their vain efforts to humiliate us. They once upon a time recognized us as "Little Freshie," etc., but they have at last discovered that we are a Class of "grit" and "backbone," and can treat their insignificant remarks, as they deserve, with contemptuous silence. Lately, a few "jokers" have been discovered among the Fresh, who "hit hard," and cover the poor Sophs with confusion, since then we rest in peace.

The record of a year is finished. We have tried to win your regard and excite your sympathy in our behalf. If our good qualities surpass the bad, do not, I beg, accuse us of conceit, but rather bestow upon us good wishes and cheering words, to encourage and help us on to nobler aims and better deeds during our remaining years at the University of Georgia.

HISTORIAN OF '90.
