Crosby's Vitalized Phosphites

IS AN ACTIVE, NITROGENOUS, BRAIN PHOSPHITE.

Other preparations of Phosphorus are but Laboratory Salts or Acids, and have nothing in their composition to make them a brain supporter, an organismal element.

Laboratory Phosphate Salts and Acids give no nourishment to the brain, they are diuretics only.

Prof. Percy, in an essay which was awarded the prize by the American Medical Association, and of the Medical Society of the State of New York, demonstrated that the Brain of Man needed VITAL Phosphites that could not be found in Laboratory products, but could be eliminated from the brains of animals and fish and from the embryos of grain.

This active Vital Phosphite gives great relief in the prostration that follows excessive study or mental labor.

There are many lawyers, statesmen, clergymen, who never attempt a great mental success until fortified with VITALIZED PHOSPHITES. There are many who without them have broken down and suffered from long prostration.

Mental Derangements, Sleeplessness, Lassitude, Debility are cured by this special Brain Food.

It has been highly recommended by many of the very best Physicians, by Prof. Willard Parker, Prof. Alfred C. Post, Prof. Geo. W. Beard, Prof. John C. Draper, and more than a thousand others.
