Flows at upper bottom here in our house and the rain and heavy continuous, have yet ever since yesterday at this time to the bottom. But in the past few days, after getting over the heavy rains, the weather is very fine, and the crops are in good condition. The crops are not enough to support the inhabitants. However, I fear that it will continue to rain. The bottom is now a little higher than it was before the rains. The crops are in a better condition than they were before the rains.
